SUMMARY

M.Sc. Artificial Intelligence student with nearly three years of experience at Accenture building customer-facing features for SAP enterprise products, working closely with product managers and engineers. Designs user journeys, interaction flows, wireframes and interactive prototypes in Figma, and uses AI tools such as Claude Code to prototype faster. Hands-on with conversational AI and AI agents, with a strong interest in agentic UX for enterprise software. Eager to grow in user research and usability testing. Proficient in English (C1, written and verbal); German A2. Available to work from the Walldorf office 1–2 days per week.

SKILLS

UX Design: User Experience Design, Interaction Design, User Journeys, Interaction Flows, Wireframes, Interactive Prototypes, Interface Design
Tools: Figma, Claude Code, Claude API, GitHub Copilot, Jira, Confluence, Git, GitHub
AI: Conversational AI, Agentic AI, AI Agents, Large Language Models (LLMs), Prompt Engineering, RAG, NLP
Development: Python, Java, SQL, REST APIs, SAP Commerce Cloud
Soft Skills: Communication, Collaboration, Cultural Awareness, Proactiveness, Initiative, Doer Mentality

EXPERIENCE

Research Assistant (HiWi), CAIRO Lab, THWS Würzburg-Schweinfurt Aug 2026 – Present

- Building a conversational interface that turns everyday human language into a humanoid robot's formal knowledge notation, using Python and local large language models

Application Development Analyst, Accenture, Hyderabad, India Jun 2023 – Feb 2026

- Built and improved customer-facing features for enterprise e-commerce platforms on SAP Commerce Cloud for global clients in the aviation and manufacturing industries
- Used Figma alongside development work to understand, discuss and build user interface features
- Worked closely with product managers, engineers and client stakeholders in Agile teams, turning user and business needs into working features
- Received the Accenture iChamp Client Focus Award (Jul 2025) for outstanding client service
- Contributed to LLM evaluation and prompt engineering for Generative AI workflows
- Resolved high-priority production issues for end users; reached 0% post-production defects on delivered features

PROJECTS

Sprint Copilot – AI Agent | *Hackathon 2026* | *Figma, Python, Agentic AI*

- Designed the end-to-end user journey and interaction flows in Figma for an AI agent that takes over a scrum master's routine coordination work
- Built the agent to match GitHub commits and Jira tickets and post per-person standups to Slack and Notion

SniffTest AI – Gamified App | *Hackathon project* | *Figma, Generative AI*

- Designed the game flow and screens in Figma for an app that trains people to spot disinformation, keeping the experience simple and engaging

WorkLog AI – Activity Tracker | *Python, Claude API*

- Built a tracker that turns developer activity into readable daily summaries, focused on what users need to see

EDUCATION

M.Sc. Artificial Intelligence, THWS Würzburg-Schweinfurt Mar 2026 – 2028 (expected)
Relevant coursework: Natural Language Processing, Machine Learning, Deep Learning, Computer Vision

B.Tech Information Technology, Malla Reddy Engineering College for Women, Hyderabad, India 2020 – 2023
CGPA 8.77 / 10, First Class with Distinction

CERTIFICATIONS

- SAP Certified Development Professional – SAP Commerce Cloud 2211
- SAP AI Masterclass – SAP Generative AI, Joule, SAP AI Core, SAP BTP (in progress)
- HackerRank Certified Software Engineer (Sep 2026)
